

## CSC3064 Assessment 2 Feedback

**OVERALL MARK: 70**

---

### **Analysis Of General Network Security Issues (72%):**

Excellent analysis of varied network security concerns.  
Good judgments on severity of issues.  
Very good insight focusing on the case-study details.  
Might also consider Wifi access, lack of NIDS, and a few other points.

### **Analysis Of Conti Ransomware Threat (65%):**

Good identification of network-based indicators of compromise (IP addresses and ports).  
Might also consider domains mentioned in CISA link.  
Some of the comments about the case-study network are confusing. E.g. use of MITM to spread (not normally associated with Conti), and discussion about switch ports is unclear.

### **Network Security Recommendations (72%):**

Very good recommendations that would comprehensively address a breadth of issues.  
Substantial insight focusing on case-study.  
Good diagram.

### **Reporting Style and Organisation (68%):**

Mostly very clear reporting style.  
Organisation very good. Some information Might be organised differently to digest at a glance. E.g. final pages.
